

## Retail Demo Overview

Persona Description

The diagram consists of a horizontal line with several dots placed above it. The dots are connected by a series of lines, forming a path. The labels 'g' and 'ffh' are placed near the dots, indicating specific points or states in the sequence.

## Customer ordering products causing low stocks

Step 1: Open Contoso Market Web Application to make a purchase and activate low stock level alert for store associate.

[illegible]

Low stock alerts are sent to FLW for immediate action

Step 2: Open Microsoft Teams to see Low Stock Alert for restock

## Customer receives a notification email that the order is ready

Step 4: Customer is informed that the product is ready for pick up.

ffh g ffh

*(Note that this happens in parallel of the previous steps whereby the store manager is ordering to restock supply)*

ffh ffh

Customer arrives in mall and gets direction to the store with the app

Step 5: Customer arrives at retail outlet and uses app to find the direction to the store for pickup

FLW prepares the order only when customer arrives

Step 6: Customer arrives at retail outlet and store associate is notified to get ready the order for pick up.

Other scenarios that this platform enables

Step 7: View telemetry in IoT Central

Using machine learning to forecast inventory requirements

Step 8 (optional): Contoso HQ working on Inventory forecasting
